

## **Brian Heldmann**

---

*Chief Engineer; Northrop Grumman Mission Systems*

Brian Heldmann is chief engineer at Northrop Grumman, focused on supply chain strategy and advanced operations. Having worked at Northrop Grumman for 15 years, Heldmann has extensive experience in microelectronics technologies, specifically advanced packaging and other strategic endeavors related to the advanced packaging ecosystem. He has knowledge and expertise in substrate onshoring; a major contribution to the national effort of strengthening the infrastructure of microelectronics manufacturing in the United States.

Heldmann has held his current role for 5 years. Previously he worked in manufacturing and led many projects related to airborne superiority and technology exploration as well as national security initiatives.

Heldmann holds a Bachelor of Science from the University of Maryland and a Masters certificate in Information Systems from Johns Hopkins University.

Northrop Grumman is a leading global aerospace and defense technology company. Our pioneering solutions equip our customers with the capabilities they need to connect and protect the world, and push the boundaries of human exploration across the universe. Driven by a shared purpose to solve our customers' toughest problems, our employees define possible every day.
