

## Memo

To: Bethpage Residents  
From: Edward Hannon, Project Director  
Date: Friday, March 10, 2023  
Subject: Electrical work to occur on March 15 on South Sheridan Avenue

---

Northrop Grumman is providing this progress report to you on our activities in support of the RW-21 groundwater treatment system project and other associated environmental activities.

Northrop Grumman contractors will conduct electrical work on a Verizon/PSEG pole located nearest to 111 South Sheridan Avenue and at our leak detection system manhole located closest to 113 South Sheridan Avenue on Wednesday, March 15, 2023, from 8 a.m. to 5 p.m. You should expect to see several workers and two work vehicles.

We ask that residents and local landscapers avoid parking vehicles within 20 feet of these two work zones during the daytime work hours. Once the work zone is clear, residents can relocate their vehicles back in those areas.

We anticipate conducting additional manhole work along the piping route the following week. As soon as that schedule is confirmed, we will communicate those street locations, dates and times to you.

If you have any questions, please contact Dianne Baumert-Moyik at (516) 754-2645 or [Dianne.baumert-moyik@ngc.com](mailto:Dianne.baumert-moyik@ngc.com).

Our project information can be found by visiting [www.northropgrumman.com/bethpage](http://www.northropgrumman.com/bethpage). Thank you.
